Report Overview: This publication on the Status of Women in McNairy County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

The Status of Women in Tennessee Counties

McNAIRY

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Women in McNairy County have median earnings of \$21,450 per year while their male counterparts have median annual earnings of \$30,028.
- ◇ 40.7% of women in McNairy County participate in the work force and women represent 44.9% of the county's labor force.
- ◇ The female unemployment rate is at 5.8% which is just slightly higher than the overall county rate of 5.2%.
- ◇ In McNairy County, 23.9% of working women are employed in managerial or professional occupations, while 21.8% of all employed persons in the county work in such occupations.

Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ In McNairy County, 70.2% of women have a high school diploma. Higher percentages of women than men have high-school level degrees; 68.5% of all county residents have a high school diploma.
- ◇ The county has a female high school dropout rate of 6.7%, about 3 percent higher than that of neighboring Chester County.
- ◇ While 8.8% of county residents have at least a bachelor's degree, 12.1% of females in the county have a four-year college degree or better.
- ◇ Over 17 percent of women in McNairy County are earning wages below the poverty level, and 31.0% of families with a female householder and no husband present live in poverty.
- ◇ The adolescent pregnancy rate for McNairy County is at 45.2 per 1,000 girls, almost 15 more than Hardin County's 30.6 per 1,000.
- ◇ Only 14.5% of McNairy County businesses are owned by women—a lower percentage than that in either Hardeman or Hardin County, neighboring counties. Women-owned businesses account for 5.8% of the total income and receipts from private firms in the county.

ABOUT THE COUNCIL AND THIS REPORT

McNairy County

The Status of Women in Tennessee Counties report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
